SOLITAIRE FURNITURE FROM RAUMPLUS

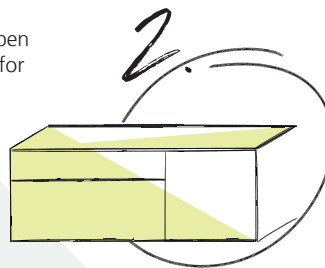

The term is not common, so we would like to start by explaining what solitaire furniture at raumplus means. A solitaire piece of furniture is a piece of furniture that stands alone and can be added to an existing piece of furniture or room solution. This can be, for example, a narrow chest of drawers in the hallway. It creates additional storage space for daily companions such as keys & co.

STIVARO FLEX

Hinge doors, drawers and open compartments are available for the front design.

STIVARO LIGRAN

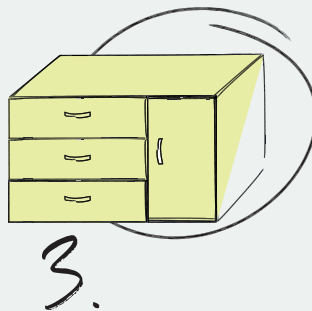

Characteristic features are the thin material and the precisely composed joint pattern, which is fully accentuated by the handleless fronts with push-to-open fittings.
