

Press information – **raumplus** presents the new »Aluminium frame hinge door RPE«

## FOR DOORS WITH FORMAT

A small abbreviation makes all the difference: »RPE« is the name of the aluminum-frame hinge door presented at the IMM 2020, with which raumplus now also offers the option of planning and creating doors up to an impressive three meters high. The new door, which has been in the range since April, has already proven that it has the knack of XL formats in style.

From old buildings to lofts - anyone who lives or works in high rooms wants to take advantage of this feature with the appropriate storage space. But usually such high-flying plans have clear construction limits. With its latest development, **raumplus** has successfully overcome these.

The carcase-bound »RPE aluminium frame hinge door«, which is guided by two hinges on the top and bottom of the cabinet, has an extra-high dimension of 62 x 275 cm as standard and is also available in formats ranging from a minimum of 30 x 200 cm to a maximum of 62 x 300 cm. This enables planners and interior designers to create cabinets and fixtures that go well beyond the normal size range.

There is also no need to be restricted in terms of design:

With the colors anodized Black, Dark Bronze and Silver, three contemporary variants are available for the profile surfaces. The range of fillings is even wider: in addition to float and tempered safety glass you can choose from mirror and numerous decorative fillings, or even choose a foil bonding with individual digital printing.

To ensure that users always have a firm grip on the extra-high doors, there are attached ashlar handles with a hollow profile or, alternatively, handle profiles recessed into the aluminium frames - both in a matching surface color.

The **raumplus** »RPE aluminium-frame hinge door« thus opens up new possibilities for implementing large furnishing plans in a way that is as elegant as it is versatile. At the company's Bremen location, in exclusive quality Made in Germany.
